

## Megacity Project- Urban Planning 101

Goal: To create a visual collage depicting the history, challenges, and innovation for a megacity.

You may use Google Slides or Prezi for your collage. You are welcome to use another program- just run it by Mrs. Bertrend.

The three questions that your photo project needs to answer:

1. What factors allowed the city to become a megacity? (Ex. location to water, other communities for trade) *Include 3 factors.*
2. What challenges does the megacity face? *Discuss at least three challenges in detail (We are scuba diving, not surfing!)*
3. What is the solution the city is or should implement to help with each challenge? *3 solutions.*

At the end you need a bibliography. This needs to include the websites where you acquired both information and photos from.

For your presentation, you are welcome to have notes with you to help you; however, you should be comfortable and confident speaking about each photo. The notes can be there to help you remember specific notes or facts, but you should not be reading entirely from the paper.

You will have 4 in-class work periods for this project. Be ready to share your project on **Monday, January 21st.**
